Consumer Price Index for the month of September 2025

The CPI for September 2025 (109.17) shows a slight increase of 0.02% compared to the index of August 2025 (109.14).

The percentage change of the CPI over the last twelve (12) months (September 2024 to September 2025) is -0.4, a decrease of 1.9 percentage points (ppts) compared to the percentage change for the same period of last year (1.5%).

The period average (last 24 months) percentage change of the CPI for the periods September 2023 to September 2024 and September 2024 to September 2025 is 0.2%, a decrease of 1.8 ppts compared to the period average percentage change over the periods September 2022 to September 2023 and September 2023 to September 2024 (2.0%).

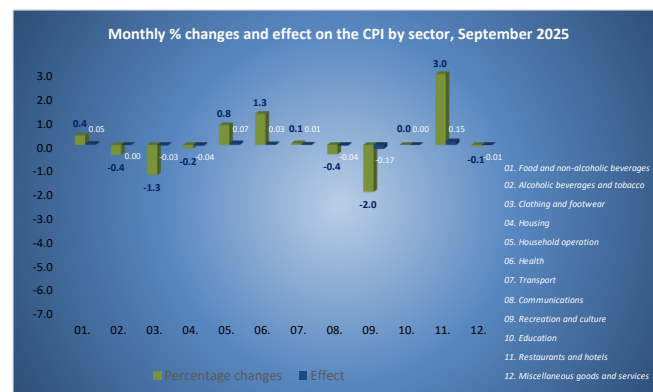

During this month, five (5) of the twelve (12) sectors registered increases in prices. The increases that had the greatest influence on the CPI were registered for the “Restaurants and hotels” (3.0%) and “Household operation” (0.8%) sectors, which contributed with an effect of respectively, 0.15 and 0.07 ppts. The increases in the remaining sectors had an effect of 0.08 ppts on the CPI of September 2025.

Aforementioned increases were partially offset mainly by a decrease in the index for the “Recreation and culture” (-2.0%) sector, which caused an effect of -0.17 ppts. The decreases in the remaining sectors had an effect of -0.11 ppts on the CPI of September 2025.

The increase in the “Restaurants and hotels” sector was mainly due to an increase of 159.6% in the category “Accommodation services”, which contributed to an effect of 0.12 ppts. The increase in the “Household operation” sector was mainly due to an increase in the category “Household appliances” (4.3%), which contributed to an effect of 0.08 ppts.

The decrease in the “Recreation and culture” sector was mainly due to a decrease in the category “Holidays” (-4.3%), which contributed to an effect of -0.09 ppts.

Consumption basket

The consumption basket of the CPI consists of 408 goods and services. Compared to August 2025, 45.1% of these products had an increase in price, causing an effect of 0.74 ppt, while 38.7% showed a decrease, contributing to an effect of -0.71 ppts and the remaining 16.2% had no change in price. Compared to August 2025 the prices of goods (-0.2%) show a decrease and caused an influence of -0.11 ppts, while the prices of services (0.3%) show an increase and contributed with an effect of 0.13 ppts on the CPI of September 2025.

Core inflation

The CPIC (core inflation) - CPI excluding the effect of energy and food – was 1.2% in September 2025. The energy index - which consists of the products: electricity, water, gasoline and diesel – was -4.2% The food index showed an increase of 0.8%.

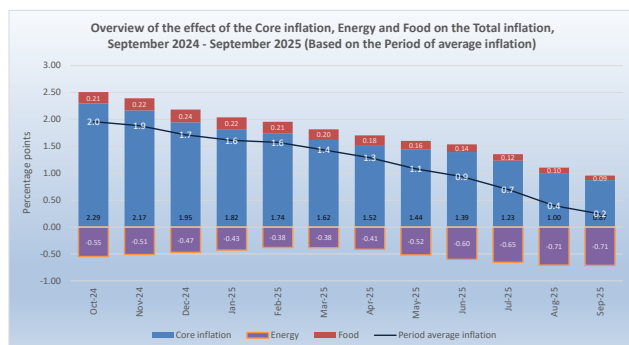

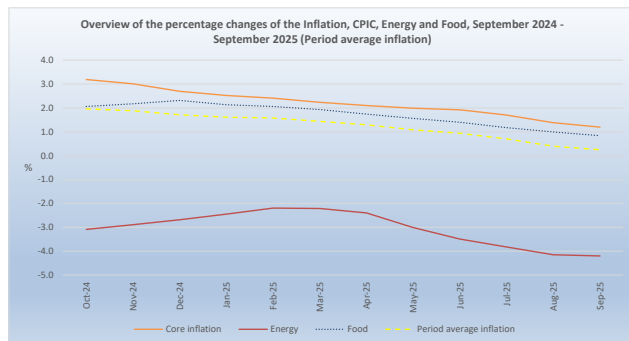

What is CPIC?

The CPIC (core inflation) is a portion of the inflation where certain items, which have volatile price movements, are excluded, such as food products and energy. When calculating the core inflation, the most volatile components are eliminated from the inflation. The core inflation index is used to assess the medium and long-term trends of the general level of prices. For purposes of economic policy-making, especially monetary policy, many economists focus on the proportion of the core inflation, as this allows a more in-depth evaluation of the recent inflation developments in the economy. The annual average of the CPI is used to calculate the CPIC.

The CPIC is calculated by comparing the average index for the most recent 12-month period compared with the preceding 12-month period.

The three main uses of a CPI are:

1. a calculation method to compensate employees due to the loss of purchasing power, adjusting their salaries, with the percentage change rate of the CPI, which is known as indexation.
2. a tool used in National Accounts to adjust components of the gross domestic product (GDP) from nominal terms to real terms. (For example, by eliminating the effect of the price changes from the consumption value)
3. a means commonly used by governments and central banks to set inflation targets.

Subsistence level

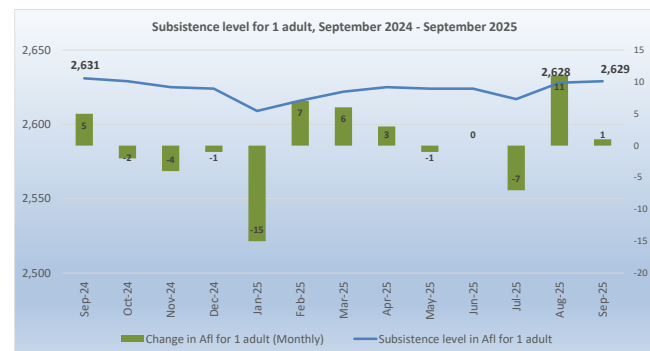

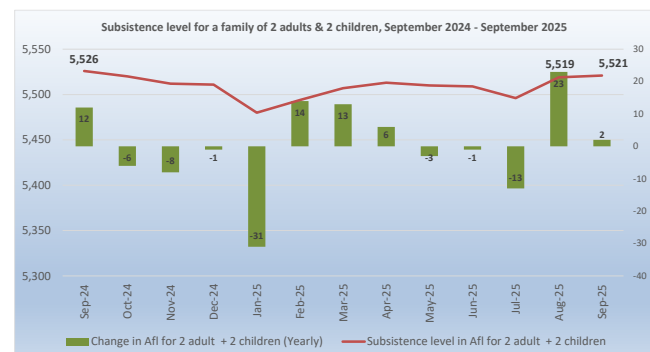

The subsistence level for a household consisting of two (2) adults and two (2) children (aged 0-15 years) in September 2025 is Afl. 5,521, an increase of Afl. 2 compared to August 2025 (Afl. 5,519). The subsistence level for a single adult household is Afl. 2,629, an increase of Afl. 1 compared to August 2025 (Afl. 2,628).

What is the Subsistence level and how is it adjusted?

The CBS defines the subsistence level as the minimum level of income that is perceived as necessary for a person or family to be able to function in the society in an adequate and socially acceptable manner. When the definition of subsistence level is used, it refers in reality to a "Social subsistence level" and not the literal definition "the money needed to purchase those goods and services deemed necessary for living a life free of basic deprivation" (United Nations).

A subsistence level index was created by calculating the cost of the essential resources that an average adult consumes during a month. Each month this index is adjusted, based on the prices of food, clothing, shelter, transportation, and other items in the basket.

The current subsistence level is based on the "Subsistence level 2010" report published by the CBS in December 2010, and is updated monthly according to the CPI. The reference unit used in this report is of a household consisting of two adults and two children (0 to 14 years). The total weight of such a household is 2.1 (1.0 + 0.5 + 0.3 + 0.3).

The subsistence level in September 2025

The subsistence level is the minimum level of income which is perceived necessary to achieve an adequate standard of living in a given country. The subsistence level is usually determined by estimating the cost of all the essential resources that an average adult consumes in one month or year. This is commonly called a basic needs index, and varies according to the price of food, clothing, housing, transport and other items in the "basket". Equivalent scales are used to adjust the assumed standard of living, of households of different sizes and composition. The scale assigns a weight of 1.0 for the first adult and 0.5 for each additional adult in the household (aged 15+) and a weight of 0.3 for each child (aged 0-14 years). The subsistence level is based on figures of the report "Bestaansminimum 2010" and is monthly updated for inflation using the monthly CPI. The reference unit used in this report is a household consisting of two (2) adults and two (2) children (aged 0-14 years).

In September 2025 the monthly subsistence level for a household consisted of two (2) adults and two (2) children (aged 0-14 years) (Afl. 5,521) showed a decrease of Afl. 5 compared to September 2024 (Afl. 5,526) and was mainly caused by a decrease of Afl. 13 in the sector "Clothing and footwear". The largest increase in September 2025 was registered in the sector "Food and non-alcoholic beverages" (Afl. 12).

In September 2025, the monthly subsistence level for a single adult household is Afl 2,629, which represents an income deficit of Afl. 643, a decrease of Afl. 2 compared to the deficit observed one year ago (Afl. 645). This deficit is the third lowest registered over a period of six (6) years for the month of September.

Change in prices of crude oil, utilities, gasoline and diesel in September 2025

The prices of utilities (electricity and water), gasoline and diesel are for the greater part determined by international crude oil prices. In September 2025 the average price per barrel of crude oil (US\$ 63.99) had a decrease of US\$ 1.68 (-2.6%) compared to August 2025 (US\$ 65.67).

The prices of electricity and water did not change compared to August 2025. Subsequently, the average electricity price per household remained at Afl. 263.67, while the average price of water per household remained at Afl. 168.73.

In September 2025 the price of gasoline did not register any change and had no effect on the CPI. The price of diesel registered a decrease of Afl. 8.20 cents (-4.0%) and had an effect of -0.01 ppt on the CPI of September 2025.

In September 2025, utilities, gasoline and diesel as a group, showed a decrease in price of 0.1% compared to August 2025, and had an effect of -0.01 ppt on the CPI, while the remaining 404 goods and services, as a group, show a slight increase of 0.04% and had an effect of 0.03 ppts on the CPI.

Change in prices of Food & catering services in September 2025

The “Food & catering services” index showed an increase of 0.5% in September 2025, after having increased 0.3% in August 2025. The index for “Food at home” showed an increase of 0.4% in September, as eight (8) of the eleven (11) “Food at home” indices increased in September 2025. The “Fruit” index registered the largest increase (3.1%) in September 2025. Furthermore, other significant increases were posted in the indices for “Milk, cheese and eggs” (1.4%), “Food products n.e.c.” (1.2%), “Sugar, jam, honey and other confectionery” (0.8%) and “Oils and fats” (0.8%). The largest decrease in September 2025 was registered for the index of “Potatoes and other tubers” (-8.7%).

The index for “Food away from home” shows an increase of 0.6% in September 2025.

In September 2025, “Food at home” and “Food away from home” as a group showed an increase in price of 0.5% compared to August 2025 and had an effect of 0.08 pts on the CPI, while the remaining goods and services, as a group, experienced a decrease in price of 0.1%, causing an effect of -0.05 pts on the CPI.

CPI for the period**September 2024 – September 2025****Consumer Price Index**

Over the last 12 months, the CPI decreased by 0.4%. Six (6) of the twelve (12) sectors registered decreases in prices. The decreases that had the greatest influence on the CPI were registered for the “Household operation” (-5.4%), “Recreation and culture” (-3.3%) and “Transport” (-1.4%) sectors, which contributed with an effect of respectively, -0.48, -0.28 and -0.18 pts. The decreases in the remaining sectors had an effect of -0.19 pts on the CPI of September 2024 - September 2025.

Aforementioned decreases were partially offset mainly by increases in the indices for the “Restaurants and hotels” (6.5%) and “Communications” (2.5%) sectors, causing an effect of respectively, 0.32 and 0.22 pts on the CPI of September 2024 - September 2025. The increases in the remaining sectors had an effect of 0.22 pts on the CPI of September 2024 - September 2025.

The decrease in the “Household operation” sector was mainly due to decreases of 11.5% and 19.7% in the categories “Household appliances” and “Furniture, furnishings, carpets and other floor coverings”, which contributed to an effect of respectively, -0.27 and -0.20 pts. The decrease in the “Recreation and culture” sector was mainly due to a decrease in the category “Holidays” (-11.9%), which contributed to an effect of -0.26 pts. The decrease in the “Transport” sector was due to a decrease of 4.0% in the category “Operation of personal transport equipment”, which contributed to an effect of -0.33 pts.

The increase in the “Restaurants and hotels” sector was due to increases in the categories “Catering services” (3.6%) and “Accommodation services” (246.3%), which contributed to an effect of respectively, 0.18 and 0.14 pts. The increase in the “Communications” sector was mainly due to an increase in the category “Telephone and telefax equipment” (62.8), which contributed to an effect of 0.21 pts.

Consumption basket

Over the last year 46.1% of the products in the consumption basket had an increase in price, causing an effect of 2.16 pts, while 44.4% showed a decrease, contributing to an effect of -2.54 pts and the remaining 9.6% had no change in price. The prices of goods (-1.4%) showed a decrease and caused an influence of -0.82 pts, while the prices of services (1.1%) registered an increase and contributed with an effect of 0.44 pts.

Subsistence level

Over the last 12 months, the subsistence level for a household consisting of two (2) adults and two (2) children (aged 0-15 years) registered a decrease of Afl. 5, from Afl. 5,526 in September 2024 to Afl. 5,521, in September 2025. This decrease was mainly due to decreases in the “Clothing and footwear” (Afl. -13) and “Household operation” (Afl. -6) sectors.

Change in prices of crude oil, utilities, gasoline and diesel

The average price per barrel of crude oil registered a decrease of US\$ 6.31 (-9.0%) from US\$ 70.30 in September 2024 to US\$ 63.99 in September 2025.

The energy index decreased by 4.4% over the past 12 months and had an influence of -0.74 pts. The indices of “Gasoline” (-8.9%) and “Diesel” (-6.6%) registered decreases over the last year, contributing with an effect of respectively, -0.42 and -0.02 pts on the yearly CPI. The index of “Electricity” shows a decrease of 4.0% and contributed with an effect of -0.30 pts, while the index of “Water” did not register any changes over this period. The remaining 404 goods and services, as a group, show an increase of 0.4% and had an effect of 0.37 pts on the CPI.

Change in prices of Food & catering services

Over the last 12 months, the “Food & catering services” increased by 1.4%. The “Food at home” index showed an increase of 0.5%, where six (6) of the “Food at home” food groups increased over this period.

The “Oils and fats” index increased by 4.1%, the largest increase among the “Food at home” food groups. Furthermore, other significant increases were posted in the indices for “Sugar, jam, honey and other confectionery” (2.9%), “Non-alcoholic beverages” (2.6%) and “Meat” (1.6%). The largest decrease during this period was registered in the index for “Potatoes and other tubers” (-6.4%).

The index for “Food away from home” increased by 3.6% over the last 12 months.

Over the last 12 months, “Food at home” and “Food away from home” as a group showed an increase in price of 1.4% and had an effect of 0.23 pts on the CPI, while the remaining goods and services, as a group, experienced a decrease in price of 0.7%, causing an effect of -0.61 ppt on the CPI.
